The True Inwardness of the Rush to the New Eldorado as Given by S. E. Heckethorn.

CHICAGO, March 21.-S. E. Heckethorn gave a reporter some points concerning the Lower California gold craze. He said: 'Geo. Sesson was in Chicago real estate a few years ago. He went to Arizona and struck a rich mine there. He afterwards met Geo. Heuller and they joined forces, buying a large tract of land from the Mexican government in Lower California under ession to the International company a concession to the International company at an average of eight cents an acre. The contract provides the international company shall colonize and develop the country, and that it shall bring in 7,000 settlers inside of three years, and 20,000 inside of twenty years; that for every bona-fide settler there at the end of twenty years the company shall receive \$60 a head for five years. On the other hand, the government pledges the company entrances to all harbors on the Pacific coast and plers on the guarantees three steamers to ply along the coast; try, and that it shall bring in 7,000 settlers inside of three years, and 20,000 inside of twenty years; that for every bona-fide settler there at the end of twenty years the company shall receive \$60 a head for five years. On the other hand, the government pledges the company entrances to all harbors on the Pacific coast and plers on the 3 guano islands; guarantees three steamers to ply along the coast; right of way for two lines of railroads, not to exceed \$75 miles in length, and \$12,000 a mile for construction expenses. This contract was entered into about two-and-a-half years ago. Since that time the International company has been doing a big business. It has been paying little attention to colonization, but much to syndicates, to which it has sold land grants and tracts of \$2.50 per acre. Things went on that way for awhile, and money rolled into the International's coffers in streams. At last the Mexican government became dissatisfied. Last November Senor Romero was made a special envoy by the government to investigate the International company and see whether it was carrying out in good faith its part of the company had forfeited its contract. Three weeks ago we first heard of rich gold mines discovered in Lower California.

Twenty thousand people are now there. The mines are quartz ledges, with a trace of gold in them; not enough to pay. Besides, there is no water and no possible chance for mills, and as for placers, they wouldn't pay for a sparrow's breakfast. Clark, the International's mineralogist, has told me time and again the quartz rock would not pay for blasting it." Hackethorn is thoroughly posted as to that region.

The North and South American continents, Europe, Australia, the West Indies, Guatemala and Mexico have all contributed wide patronage and testimony of the most favorable kind—but unsolicited—to swell the reputation of this sterling remedy. Among the maladies for which the most convincing public and professional testimony proves that it is a benign curative, are chilis and fever, bilious remittent, dumb ague and ague cake, dyspessia, liver complaint, nevousness, debility, kidney and bladder complaints. It mitigates the infirmities of age, hastens convalescence, has a tendency to prevent ill consequences from exposure and exhaustion. Lenten Observance in Russia. Nowhere in Europe is Lent kept as rig-rously as it is in Russia. There the faithol can eat neither meat, eggs, milk nor butter during the entire forty days. Even in cooking, oil is used instead of butter or ard, and not even the children are allowed

to drink milk. On the day before Easter nothing is eaten, and just before midnight the people all go to church bearing with them provisions of every description. At the stroke of 12 the church, which has previously been kept in utter darkness, is suddenly illuminated, and then, after the food has been blessed, the eating begins, and the people satisfy their hunger before leaving the sacred edifice. On Easter Sunday everybody has the privilege of saluting whoever he may chance to meet with three kisses on the cheek. Even the emperor himself is not exempt from this custom, and it was the custom in former years for the czar to walk abroad on that day to receive the embraces of his people, but this custom has been discontinued by the present Emperor Alexander, who is afraid of being killed by the Nihilists, and does not care to court publicity in such a manner.

HELENA, Oct. 7, 1887.

I was suffering from an unusually bad cough, my lungs were sore and congested, and I consulted one of the best physicians in Helena, whose prescriptions falled to relieve me. I became alarmed, and at the suggestion of a friend purchased a bottle of Acker's English Remedy for coughs, and after taking it according to directions was completely cured. I therefore cheerfully recommend it.

When Macbeth ironically asked, "Canst hough minister to a mind diseased?" he little knew that mankind would one day be blessed with Ayer's Sarsaparilla. In purifying the blood this powerful alterative gives tone and strength to every function and faculty of the system.

Chamberlain's Cough remedy will cure a cold in less time than any other treatment. Its effect is to loosen the cold, render the mucus less tenacious and easier to expectorate, and cause its expulsion from the air cells of the lungs. It also opens the secretions, allays the fever, and restores the system to a natural and healthy condition. Sold by H. M. Parchen & Co.

An eminent physician says: A healthy liver secretes from two to three pounds of bile every twenty-four hours and disposes of this secretion where it will do the most good. Now if the liver is out of order, the whole system is in trouble, the spirits are depressed, the mind is not clear, and a person whose liver is not performing its duty is very soon unfitted for regular business. Dr. Henley's Dandelion Tonic rouses the torpid liver snd enables it to perform its proper functions, thereby regulating the whole system. Sold by R. S.
